

# 10 APPS THAT WILL CHANGE YOUR LIFE

BY WENDY LEWIS

The first step is admitting you have a problem, and I have a big one when it comes to apps. I guess you could say I'm "appdicted." I'm not one of those penny-pinching app addicts either; I'll pay anything to improve productivity and efficiency and decrease online angst.

The problem with apps is that a lot of them were designed by 17-year-old tech wiz kids and they are, well let me say, not so sophisticated, reliable, or consistent. There are bugs in most apps. I search for apps that have a rating of four stars or more, and have had recent (past six months) updates to fix the bugs and make improvements.

So here are the top 10 apps that have made my 24/7 online life just a tad easier. Hope they work for you, too.

It's not perfect, but it makes the process of uploading fast and easy from any Macbook.
